Embrace the Transformative Power of High-Performance Low-Code

The world of technology is evolving rapidly, and with it, the demand for innovative solutions is increasing. Adopting low-code is the way forward for CIOs and IT managers who face accelerated deadlines and persistent backlogs. Taking a new approach—High-Performance Low-Code—means capturing missed opportunities, reducing time-to-value, and outpacing competitors in this increasingly dynamic digital landscape.

65%
of application development activities will be driven by low-code platforms by 2024.

70%
of top performing companies are using their own custom-made software to differentiate themselves from their competitors.

Build up to 10x
the speed of traditional software development.

- Mobile Applications
- Customer Applications and Portals
- Internal Business Applications
- Core Systems

High-performance low-code is superior in all aspects:

	High-Performance Low-Code	Standard Low-Code
Users	Designed for professional developers	Optimized for non-developers
Use Cases	Workgroup to mission-critical, strategic applications	Workgroup applications
Developer Experience	Full-stack, omnichannel capabilities	Limited domain-specific development capabilities
Security	Enterprise-grade security, governance, and compliance capabilities	Basic and ad hoc
Governance	Zero trust, enterprise-grade	Unavailable or limited
Scalability	Auto-scaling for 1000s to millions of users	10 to 100s of users
Life-Cycle Management	Integrated, AI-based automation	Limited
Integration	Advanced integration with 100s of databases and systems of record	Simplified integration with third-party services
Cloud-Native Apps	Kubernetes, serverless, microservices, & cloud-native services	Unavailable or Kubernetes only

OutSystems is the #1 Low-Code Platform® because it's the only one that delivers high-performance low-code. It provides you with:

Power

25 Rossmann apps
running on OutSystems
20k Rossmann users
served daily

"OutSystems gives us the ability to build applications we need with virtually no limits, including extensive apps that cover critical operations."

Robert Haber Business Solutions Architect, Rossmann Poland

Agility

4.5 stars ★★★★½
DĀK rating on the App Store

"Building DĀK on OutSystems was a no-brainer. It gives us the agility to improve our product continuously. Plus, we'll reuse lots of this development when we modernize our web portal."

Freek van Eijk, Product Owner, WoningNet Challenge

Security

500+
security validations
from design to runtime

"We need to pass audits for SOC and HIPAA. OutSystems gave us the governance, control, and security features we needed. No other low-code platform we evaluated came close."

Jesse Eterovich, Vice President of Technology, USACS

Scalability

24% up to $4.3M:
app dev cost savings with OutSystems

"With OutSystems, we could reimagine user journeys and deliver elegant user experiences without needing to improve, upgrade or replace back-office systems."

Katia Bartels, IT Director Global Experience Design and Innovation, Medtronic

Unlock the full potential of AI-powered software development

Combining high-performance low-code and generative AI yields far more than the sum of the parts — helping you turbocharge development cycles, amplify productivity, and create apps that differentiate you from competitors faster than ever before.

#1 Obstacle for CIOs when trying to achieve their digitalization objectives is the lack of talent

+1,200,000
Unfilled Software Engineer positions, by 2026 (US)

84% of C-suite executives believe they must leverage AI to accomplish their growth objectives

AI enables developers to streamline repetitive tasks like:

Coding
Debugging
Testing
Deploying

When combined with the benefits of high-performance low-code:

Governance required to safely reap AI's benefits
Power to deliver whatever the business asks for
Agility to adapt apps to evolving business needs
Security to build mission-critical customer apps
Scalability to grow with your success

High-performance low-code + AI =

100x productivity

30% growth in team skills

Turbocharge your software development with AI-powered low-code

Use AI inside your applications

60+ Ready-to-use AI connectors, including AWS, Google, Microsoft, and ChatGPT

Quickly implement generative AI-based use cases for:
- **Content generation**
- **Content summarization**
- **Semantic search**
- **Process automation**

Use AI to develop your applications

AI Code Mentor
An artificial expert provides just-in-time help and knowledge

"I just tried this for the first time, and what used to take five minutes of searching and a lot of mouse movement took about a second. The AI feature guessed exactly what I wanted to do!"

Vincent Koning, Software Engineer, Royal Boskalis Westminster

Use AI to manage the lifecycle of your applications

4 AI Mentors

- Ensure critical architectural standards are met
- Identify security vulnerabilities
- Identify possible performance bottlenecks
- Reduce technical debt

5+ years of continuous innovation

Why OutSystems for AI-powered rapid software development?

"[OutSystems] strategic strengths are its commitment to innovation (proven by its early investments in AI assistance and an aggressive roadmap)."
