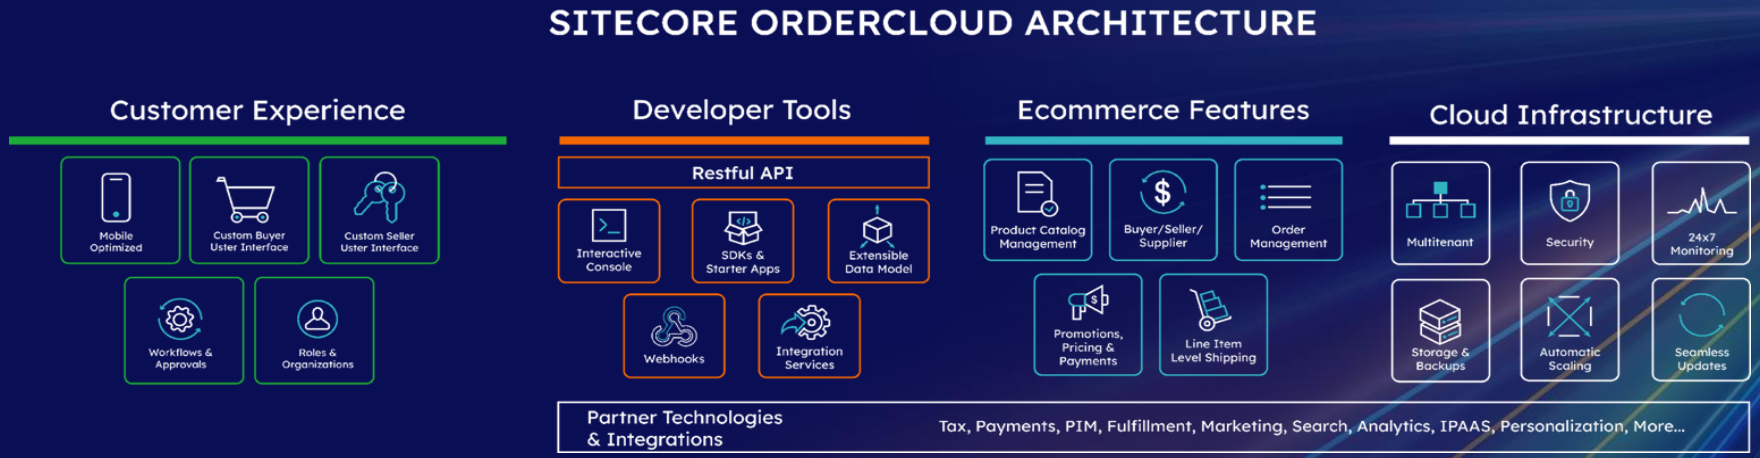
SITECORE ORDERCLOUD: A DEEP DIVE



COMPOSABLE COMMERCE WITH ON.E

MICROSERVICES

Individual pieces of business functionality that are independently developed, deployed and managed.

API-FIRST

All functionality is exposed through an API - making it possible to tie together two or more applications or services.

CLOUD-NATIVE SaaS

Leverages the full capabilities of the cloud, • beyond storage and hosting, including elastic scaling of resources. Manually updated functiontality.

HEADLESS

Front-end user experience decoupled fromback end logic - complete design freedom.
